

# Fatigue Risk Management SM4 Benefits

## Everything you need to manage fatigue risk in your operation.

Pulsar Informatics, a Global Aerospace partner, is a world leader in fatigue risk management solutions for Part 91 and Part 135 aviation operations. As a Global Aerospace customer, you have access to Pulsar's suite of fatigue risk management products and solutions made available to you through the SM4 program.

The SM4 Safety Program was built on the concept of integrating four critical safety components: **planning, prevention, response, and recovery.**

Since 2009, the program has continuously evolved to meet the needs of the industry and provide targeted subject matter experts and financial support to the Aerospace sector.

Pulsar's programs are practical, easy to implement, and represent real advances in addressing fatigue risks in aviation.

### Vista Elite Level II

**For Vista Elite Level II policyholders,** Global Aerospace will cover the cost of your subscription to Pulsar's Aviation Fatigue Meter in Year 1, as well as PVT WorkFit in Year 2. These software tools work together to help you uncover elevated fatigue risk associated with flight and duty schedules and support fitness for duty assessments to identify instances where individual factors contribute to fatigue risk. See the one-page brochure associated with each product for more information.

### Vista Elite Level III

**As an enhanced benefit to Vista Elite Level III policyholders,** you are eligible for Vista Elite Level II benefits *plus* Global Aerospace will also cover the cost of Pulsar's Fatigue Risk Management Program Implementation consulting service during the first year, and an Individual Fatigue Snapshot fatigue audit covering up to three crew members during years 2 and 3. These services are geared toward elevating your fatigue risk management posture to industry best practices aligned with Flight Safety Foundation and IS-BAO guidelines. See the one-page brochure associated with each service for more information.

### 3-Year Roadmap to a Comprehensive Risk Management Program
