

# Need help managing driver fatigue?

Our solutions provide vital insights about the fatigue stressors that are affecting your drivers.

## TRUCKING fatigue meter™

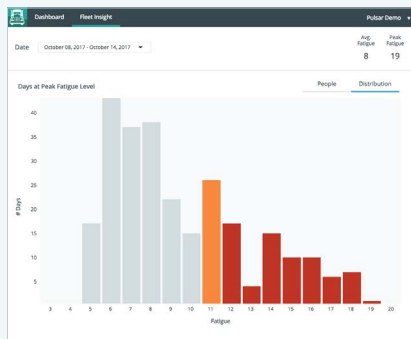

TRUCKLOAD CARRIERS ASSOCIATION

### MANAGE

Improve operational fatigue risk.

- Understand how much driving is occurring at high fatigue levels
- Learn which parts of your organization and which drivers carry the most risk
- Enable stronger education and process improvement

### COACH

Understand what is driving the fatigue risk.

- Whether it's today's workshift or the entirety of the workweek, know what the issues are
- Consider operational adjustments and coach the driver on various options

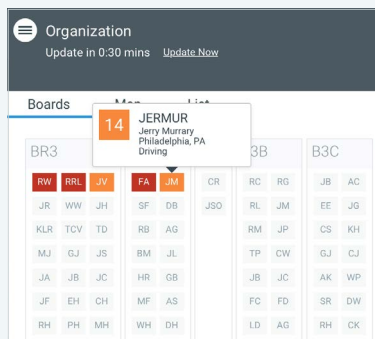

"When we give the drivers the information, more often than not they will make the right decisions."

— Dean Newell, VP Safety and Training

### MONITOR

No wearables or additional equipment required.

- Assess the fatigue risk levels of your fleet in near-real time
- Get seamless integration with your ELD system through an API to monitor for fatigue issues
- Spot drivers that may benefit from a safety conversation
